

# SHIELDTUNNEL<sup>™</sup>

## OVERSPRAY COLLECTION SYSTEM

**ShieldTunnels<sup>™</sup> capture and drain water protect your drying processes and your manufacturing facility.**

JetAir's ShieldTunnels<sup>™</sup> provide leading drying performance while capturing overspray from removed water. These washdown stainless steel enclosures come pre-installed with air knife mounting hardware, enabling simple integration into any line. These enclosures offer sound attenuation and safely drain water below the conveyor. They are available in a variety of lengths with custom-sized mounting hardware to fit the needs of the specific application. ShieldTunnels<sup>™</sup> are ideal for low to moderate speed packaging lines.

## MEET THE FAMILY

## Features

### SHIELDTUNNEL HIGHLIGHTS

- Self-supported application-specific air components
- Overspray collection
  - Drains water underneath conveyor
- Air noise reduction
- Lift-off side panels
- JetSet™ mounts for fast and repeatable changeovers
